Susan Lenigar

To Whom It May Concern:

The active participation of a foster caregiver in the child's therapy is an important part of the child's healing process. Foster caregivers receive training about a variety of mental health issues and other issues related to foster care through their involvement in the therapy process. Often, as a result of their participation in a child's therapy, foster parents are receiving training on the issues being dealt with in therapy.

Foster Child Date(s)

Hours relevant for training credit: \_\_\_\_\_

(A foster parent may earn a maximum of ten (10) hours per certification period from their participation in a foster child's therapy. By totaling the number of minutes in each session or sessions, the time earned in the session(s) must total one (1) hour before training credit is earned.)
